EXECUTIVE SUMMARY

Hassan Oubihi is a high-performing Software Engineering student in his third year at China West Normal University (graduating July 2027), with over **four years of professional full-stack development experience** acquired through sustained freelance work for real-world clients. He brings a rare combination of academic depth and hands-on delivery capability, having independently built and deployed web applications, managed client relationships, and led cross-functional student teams.

His academic curriculum covers the full breadth of modern software engineering: **Java enterprise application development, database systems, machine learning, data structures and algorithms, operating systems, mobile application development, big data, and web front-end engineering**. This technical depth, combined with demonstrated leadership (founding a 50-member university technology club) and multilingual communication skills (Arabic, French, English, Chinese), makes Hassan an exceptionally well-rounded internship candidate.

"I don't just study software engineering — I build it. Every client project I've delivered has taught me something a textbook cannot."

TECHNICAL COMPETENCIES

Domain	Technologies & Skills	Level
Programming Languages	JavaScript, Python, Java (OOP + EE), C	Advanced
Frontend Development	HTML5, CSS3, Responsive Design, UI/UX Principles	Advanced
Backend Development	Java EE Enterprise Applications, Server-side Logic, REST APIs	Intermediate+
Database Engineering	SQL, Database System Principles, Data Modelling, Big Data Fundamentals	Intermediate+
Algorithms & CS Theory	Data Structures, Algorithms, Discrete Mathematics, Linear Algebra, OS	Intermediate+
Machine Learning	ML concepts, Probability & Statistics, Computational Mathematics	Intermediate
Mobile Development	Mobile Application Development, Android basics, Embedded Systems	Intermediate
DevOps & Tools	Git, GitHub, WordPress, Vercel, SEO, Performance Optimization	Advanced
Web Frameworks	Java Web Application Development, Java EE, Node.js basics	Intermediate+

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer · Remote · Jan 2021 – Present

Since January 2021, Hassan has operated as an independent full-stack developer, acquiring and serving real clients across web development projects. This 4-year track record of paid freelance work demonstrates not only technical proficiency but also professional accountability, client management, and independent project delivery.

- Designed and developed 10+ production websites and web applications for paying clients
- Delivered responsive, cross-browser compatible solutions using HTML5, CSS3, and JavaScript
- Managed complete project lifecycles independently: from requirements gathering to deployment
- Applied SEO optimization and performance engineering to improve client site metrics
- Integrated third-party APIs, WordPress CMS, and e-commerce functionality across projects
- Maintained professional client relationships across iterative development cycles

Founder & President — Software Engineering Club · China West Normal University · May 2023 – Jan 2025

In May 2023, Hassan founded the university's first Software Engineering Club entirely from scratch. Under his leadership over nearly two years, the club grew to over 50 active members, establishing itself as a cornerstone of campus technical culture. This initiative demonstrates entrepreneurial thinking, community building, and the ability to lead teams toward shared technical goals.

- Built the club from zero to 50+ active student members within the first year
- Designed and delivered coding workshops covering web development, algorithms, and SE principles
- Led cross-functional project teams using agile methodologies: sprint planning, reviews, retrospectives
- Mentored junior students individually in programming fundamentals and debugging strategies
- Organized hackathons, technical seminars, and peer programming events
- Developed advanced leadership, public speaking, and team coordination skills

ACADEMIC PROFILE & CURRICULUM

Hassan's degree curriculum at China West Normal University covers an exceptionally broad range of software engineering disciplines. The following coursework demonstrates his readiness for senior-level internship responsibilities:

Category	Courses Completed
Programming & Development	Java OOP, Java Web Application Development, Java EE Enterprise App Development, Java EE Hands-on
Database & Data Engineering	Database System Principle, Data Structure, Big Data Foundation
Computer Science Theory	Discrete Mathematics, Linear Algebra & Probability Statistics, Probability Statistics, Calculus, Computer Op
Artificial Intelligence	Machine Learning, Guidance on Innovation & Entrepreneurship
Practical Training	Web Front-end Design Skills Practical Training, Java Web App Dev Skills Practical Training, Java Program
Foundations	Basic Computer Courses, Chinese Literature Foundation, Overview of China

LANGUAGES & COMMUNICATION

Language	Level	Context
----------	-------	---------

Arabic	Native / C2	Mother tongue — full professional fluency
French	Fluent / C1	Strong written and spoken — ideal for France internships
English	Professional / B2+	Technical documentation, client communication, academic work
Chinese (Mandarin)	Intermediate / HSK3	3+ years immersive study in China — ongoing improvement

Hassan's French fluency is a significant asset for French companies seeking candidates who can integrate seamlessly into Francophone work environments. His Chinese language ability reflects his adaptability and commitment to thriving in a foreign academic environment.

WHY HIRE HASSAN — CANDIDATE SUMMARY

◆ Real-World Experience

4+ years of paid freelance development — not just academic projects. Hassan has delivered working software to real clients with real deadlines.

◆ Full-Stack Depth

From HTML/CSS/JS on the frontend to Java EE on the backend, SQL databases, and now Machine Learning — Hassan covers the stack.

◆ Database Competency

Formal coursework in Database System Principles, Data Structures, and Big Data Foundation, combined with practical application in client projects.

◆ Leadership Proven

Built a 50-member university tech club from zero. This requires vision, execution, and the ability to inspire others — rare in a student candidate.

◆ Multilingual Asset

Arabic, French, English, Chinese — Hassan can work in any international tech environment and is particularly ready for France-based roles.

◆ Self-Driven Learner

Started freelancing at 17 while studying full-time. Simultaneously managing Machine Learning, Java EE, Big Data, and client work requires exceptional discipline.

INTERNSHIP OBJECTIVES

Hassan is actively seeking internship opportunities in the following domains, with availability in **China (immediately)** or **France (flexible start)**:

- Software Engineering Intern — full-stack, backend, or system-level development
- Web Developer Intern — frontend, backend, or full-stack web application development
- Database / Backend Engineer Intern — SQL, data modelling, server-side systems
- Machine Learning / AI Intern — applying Python, statistics, and ML coursework in practice
- Java Developer Intern — enterprise Java (EE), Spring, or backend Java services

For further information, portfolio samples, or to arrange an interview, please contact Hassan directly at hassanoubihi04@gmail.com or +86 173 9021 6248. Portfolio: hassanoubihiweb.vercel.app
